DEFINITIONS:

Fence. An artificially constructed barrier of any material or combination of materials erected to enclose, screen, or separate areas. Fences shall be designed, constructed, and finished so the supporting members thereof shall face the property of the owner of the fence.

Wall. A continuous vertical brick, stone, or masonry structure that encloses or divides an area of land.

Hedge. A fence or boundary formed by closely growing bushes or shrubs.

Fence, Closed. A fence designed to inhibit public view and provide seclusion and, when viewed at right angles, having less than fifty percent (50%) of its vertical surface area open to light and air. Examples include, but are not limited to, board on board fences and picket fences where the boards abut one another.

Fence, Open. A fence constructed for its functional, ornamental, or decorative effect and, when viewed at right angles, has more than fifty percent (50%) of its vertical surface area open to light and air. Examples include, but are not limited to, chain link, split rail, or wrought iron fences.
